* The effective interest rate, the annuity amount and the total revolving loan repayment amount are calculated assuming that the maximum amount of the revolving loan is withdrawn at once and that is repayable in 12 monthly instalments in their full amount. Different amounts and dynamics of withdrawals, a longer repayment period and payments of amounts different from monthly instalment amounts shall result in a different calculation of the effective interest rate.

** The fee applies to declined authorizations at an ATM that occurred within the same calendar day.
